The authors regret that an error occurred in Table 6 of the above paper. The ARR for Kampman et al (2012) was displayed as 5.02 with a NNT of 19.91; however, it should have been an ARR of  $-5.02$  with a NNTH (i.e. NNT with a negative outcome or harm) of 19.91.

This does not change any of the other conclusions or analyses in the paper.

The authors would like to apologise for any inconvenience caused.
